

M-FILES Additional components

RAEMULAN LAND, INC.

July 19, 2024

Easy, secure, and efficient document management for all companies

We understand that document management can be a time-consuming and costly process for businesses of all sizes. That's why we have developed a secure and efficient system to help you manage and store your documents in the cloud to streamline your document workflows, improve collaboration, and increase productivity. You can easily upload and access your documents from **anywhere, at any time**, using a web browser or mobile device. Our system also provides robust security features, including encrypted data storage and user access controls, to keep your sensitive information safe.

Executive Summary

Dear Ms. Chona Andrade

Below is our proposal outlining our recommendations of your Company's M-Files additional components

The document includes a proposal to deliver a solution to address the following concerns as stated in Raemulan Land, Inc. objectives:

- External connectors to connect M-Files with external repositories
- Extra Cloud storage
- Additional concurrent and named licenses
- Hubshare requirement

Actual Financial details of the Solution will be presented at the Commercial Proposal section of this document

Thank you for considering FUJIFILM Business Innovation Philippines. We hope this proposal can help address your Process Automation Requirement:
